ExxonMobil is looking for outstanding candidates for the position of...

Junior Inspection Engineer

Job Role Summary

In a modern refinery, the inspection group is a key part of the organization in maintaining a safe and reliable operation. This group is responsible in identifying degradations, inspecting to identify the extent and defining repairs/replacements as required. The inspection group works together with other parts of the organization to plan and execute the different phases.

Primary Job Functions of an Inspection Engineer:

For graduates/early career candidates with an engineering background (university degree) there are different options to start a career in Italy within Esso Italiana and the ExxonMobil Group. One of the starting positions is 'Inspection engineer' in the Augusta refinery (Sicily). He / She has the responsibility to develop and execute an inspection plan for plant equipment/piping in line with company guidelines and Italian regulations. As part of the inspection group, he/she will be a key member in the decision process for the yearly work plan. He / She will need to work together with the team to decide on necessary repairs and/or replacements for equipment. As an international organization, he/she needs to connect with peers all over the globe to share and learn.

Job Role Responsibilities

- Mechanical, Materials or Inspection Engineering degree
- Fluency in English
- Genuine interest and orientation to work in an international context
- Full domestic / international mobility
- Work/study experience abroad an asset
- We are looking for talents who have strong leadership, interpersonal, analytical, technical & organizational competencies.

Our offer:

- Our people are driven, result-oriented and focused on getting the best out of their teams.
- Our company culture: open, with an international mindset and down to earth.
- Development through our hands-on approach, job rotation system and regular training enable our people to learn and develop their talents continuously. The acquired skills and knowledge will help them to become our future generation of managers or technical specialists.
